## Elite Nitro 14-0-0

### Overview:

Elite Nitro 14-0-0 is an Organic Foliar Fertilizer containing hydrolyzed proteins from plant based source. The source of Nitrogen is from Amino acids and not salts. The Amino acids in the product are readily absorbed by the crops.

### Features:

100% water soluble free flowing powder. Contains 85-88% Amino acids. Approved for Organic use.

### Benefits:

Immediately treats Nitrogen deficiency in crops. Increases Nitrogen use efficiency in plants. Does not burn leaves. Increases vegetative and foliage growth.

## Elite GRO 10-0-4

### Overview:

Elite Gro 10-0-4 is a blend of Elite Nitro and Elite K. The grade is optimized for use in cereal crops to promote vegetative growth and grain yield

### Features:

100% water soluble free flowing powder. Approved for Organic use. Special blend for cereal crops.

### Benefits:

Increased grain yield. Better plant growth and stress tolerance. Improved drought and heat stress. Does not burn leaves and readily absorbed by plants.

## Elite GraN 9-4-0

### Overview:

Elite GraN 9-4-0 is an Organic granular slow release Nitrogen fertilizer. Nitrogen is released upto 3 - 4 weeks after application. It is derived from hydrolyzed proteins and Amino acids

### Features:

Slow release and easy flow granules. Should be placed along the seed row. Approved for Organic use. Zero salt and adds organic matter to soil.

### Benefits:

Nitrogen released throughout the growing season. Does not leach or volatilize like manure. Improves soil biology around the rhizosphere. Increases vegetative growth and yield.

## Elite PhoS 0-17-0-12S

### Overview:

Elite PhoS 0-17-0-12S with 5% Humic acid is an Organic granular fertilizer that provides the much needed Phosphorus and Sulphur. It is derived from rock Phosphate mixed with Sulphur and active Humic acid for faster release of both nutrients in plant available form.

### Features:

Fast acting easy flow Organic granules. Readily available Organic Phosphorus and Sulphur. Should be placed along the seed row. Approved for Organic use. Zero salt and adds Organic matter to soil.

### Benefits:

Improves root growth and better nutrient assimilation. Increases flower retention and branching. Does not leach from soil. Does not affect soil pH. Maintains plant energy and improves yield.

## Prime Micro CU

### Overview:

Prime Micro Cu 7-0-0-15Cu is an Organic Copper supplement for crops. It corrects crop deficiencies in Copper. The Copper is chelated to Amino acids which increases the plant uptake from foliar applications.

### Features:

100% water soluble free flowing Organic fertilizer. Approved for Organic use. Zero salt fertilizer with both Copper and Nitrogen.

### Benefits:

Treats copper deficiencies in crops. Promotes transport of starch in cereals. Improves crop stand-ability and Nitrogen use efficiency. Protects plants from biotic stress.

## Prime Micro CA

### Overview:

Prime Micro Ca 5-0-0-12Ca is an Organic Calcium supplement for crops. It is used to correct deficiencies of Calcium and provides added strength to crops. The Calcium in the product is chelated with Amino acids for faster absorption and increased uptake from foliar applications.

### Features:

100% water soluble free flowing Organic fertilizer. Used as in-furrow application with Molasses or foliar application. Approved for Organic use. Zero salt fertilizer with both Calcium and Nitrogen.

### Benefits:

Treats Calcium deficiencies in plants. Promotes healthier plants. Protects the plants from both biotic and abiotic stress.

## VIGOR Plus

### Overview:

Vigor Plus is an innovative product exhibiting bio-stimulant properties in plants. Vigor Plus is a proprietary mix of concentrated Humic acids and Kelp extracts modified for better absorption and increased plant bio-stimulant activities.

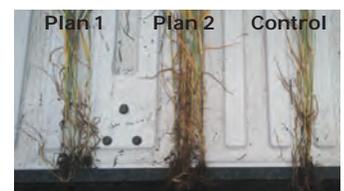

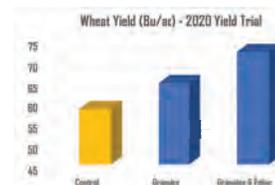

### Features:

Water soluble liquid. Approved for Organic use. Contains bio-active peptides, Humic acids, vitamins and growth promoting factors.

### Benefits:

Used as a seed treatment or foliar spray. Increases seed vigor and faster germination. Promotes vegetative and root growth. Increases plant tolerance to various stress. Increased nutrient availability in plants and yield.
